

ABSTRACT OF THE DISCLOSURE

A system and method of recording information on a recordable optical disc to provide a multimedia enabled disc. The method comprises the steps of selecting a plurality of digital still images, selecting at least one audio clip, encoding the plurality of digital still images and the audio clip as a single MPEG bitstream, encoding each of the plurality of digital still images as a digital image file; and recording the single MPEG bitstream and the plurality of digital image files on the recordable optical disc.
